

CS/B.TECH/ECE(O)/ODD/SEM-7/EC-704B/2019-20

**MAULANA ABUL KALAM AZAD UNIVERSITY OF
TECHNOLOGY, WEST BENGAL**

Paper Code : EC-704B

PUID : 07084 (To be mentioned in the main answer script)

EMBEDDED SYSTEMS

Time Allotted : 3 Hours

Full Marks : 70

The figures in the margin indicate full marks.

*Candidates are required to give their answers in their own
words as far as practicable.*

**GROUP - A
(Multiple Choice Type Questions)**

1. Choose the correct alternatives for any *ten* of the
following : 10 × 1 = 10

i) ARM architecture is of

- ☒ a) 32 bit b) 8 bit
c) 16 bit d) none of these.

ii) A powerful modeling language used extensively in
software development, specially designed for

- ☒ a) UML b) C
c) SMI d) JAVA.

★★-7509/7(O)

[Turn over

CS/B.TECH/ECE(O)/ODD/SEM-7/EC-704B/2019-20

iii) I²C Bus stands for

- a) intra IC connect bus
- ☒ b) interface IC connect bus
- ☒ c) inter IC connect bus
- d) none of these.

iv) Who determines which task/process is to be executed at a given point of time ?

- ☒ a) process manager b) context manager
- c) scheduler d) both (b) and (c).

v) Which is special variation that is used to take note of certain actions to prevent any task or process from processing ?

- ☒ a) Semaphore
- b) Mutex
- c) Buffer
- d) Counting semaphore.

vi) In embedded system design, actuator acts as a

- a) input device ☒ b) output device
- c) memory device ☒ d) both (a) and (b).

vii) USB stands for

- ☒ a) Universal serial bus
- b) Uniform serial bus
- c) Universal service bus
- d) none of these.

viii) In distributed embedded controller which type of bus is used ?

- a) CAN bus
- b) USB bus
- ☒ c) I²C bus
- d) SPI bus.

ix) Cache memory is used to reduce the speed gap between <http://www.makaut.com>

- ☒ a) CPU and main memory
- b) CPU and secondary storage
- c) CPU and virtual memory
- d) Main memory and virtual memory.

x) Which of the following is not an embedded system ?

- a) Laptop
- b) Washing machine
- c) Cellular phone
- ☒ d) Pacemaker.

CS/B.TECH/ECE(O)/ODD/SEM-7/EC-704B/2019-20

xi) Compared to FPGA, gate array design style has

- a) less chip utilization factor
- b) more chip speed
- c) more flexibility
- d) none of these.

xii) DRAM is widely used because of the following :

- a) refreshing operation is not needed
- b) low cost and high density
- c) low power consumption
- d) high speed.

GROUP - B

(Short Answer Type Questions)

Answer any *three* of the following. $3 \times 5 = 15$

2. a) Define embedded system.
b) How does DSP differ from a general purpose processor (GPP) ?
 $2 + 3$
3. a) Compare Von-Neumann and Harvard architecture of a processor based system.
b) What do you mean by memory hierarchy in an embedded system ?

CS/B.TECH/ECE(O)/ODD/SEM-7/EC-704B/2019-20

4. What do you mean by 'hardware-software co-design' for embedded systems ? Explain it with a suitable block diagram.
5. a) How watchdog timer is different from normal time ?
b) What is its importance in embedded system ? 3 + 2
6. Explain the FPGA architecture with proper diagram.

GROUP - C

(Long Answer Type Questions)

Answer any *three* of the following. $3 \times 15 = 45$

7. a) How does a microprocessor differ from a microcontroller ?
b) What are the specific features of an embedded system processor ?
c) Compare RISC and CISC architecture.
d) Now-a-days high performance embedded systems use either an RISC processor or a processor with an RISC core with a code-optimized CISC instruction set. Explain. $2 + 4 + 6 + 3$
8. a) What are the differences among direct mapping, associative mapping and set-associative mapping used in Cache Memory Organization ?

CS/B.TECH/ECE(O)/ODD/SEM-7/EC-704B/2019-20

- b) Design an interface circuit to connect an 8 KB RAM chip to the 8051 microcontroller. 5 + 10

9. Define RTOS. In what respect RTOS is different from general purpose Operating system ?

Write down some important RTOS service. Discuss how "Interrupt source call" are handled by RTOS.

Name three popular RTOSs used in mobile phones, starting from the most popular. 2 + 2 + 4 + 4 + 3

10. a) What are the features of UML ?
- b) Define any four of the following terms in relation to UML : <http://www.makaut.com>
- (i) Class (ii) Abstract class (iii) Signal (iv) Package (v) Object
- c) What are the problems faced in modeling the processes in a multiprocessor system ?
- d) Draw an FSM model of an automatic chocolate vending machine. The machine permits only one type of coin Re. 1, one chocolate at a time and one chocolate is cost Rs. 8. 3 + 4 + 3 + 5

CS/B.TECH/ECE(O)/ODD/SEM-7/EC-704B/2019-20

11. What is a kernel ? Discuss in brief about monolithic and microkernels. Discuss in brief about the differences between a process and a thread. Show the schematic view of a multi-threaded system. What is a binary semaphore ?

2 + 3 + 3 + 5 + 2

12. Write short notes on any three of the following : 3 × 5

a) - Bluetooth

b) RFID

c) USB

d) System on chip (SOC)

e) JTAG

f) Flash memory.
